

How to Send a Text Message

Now you've installed, we recommend you celebrate by sending yourself or a friend a message to check it is all working. e-txt™ is styled on Microsoft Outlook to make it as intuitive to use as possible.

Click on **New SMS** (top left icon) to open a new SMS Message window.

Type the mobile number in International format, e.g. 447974193783 for UK, in the 'To' field, and a test message in the big content box.

Note the Characters Used and Characters Remaining counts at the bottom of the screen. These are **VERY** important as you could send two messages instead of one by mistake

Press the Send icon at top left, and wait for the mobile to sound!
